2010 CISC Workshop on Internet Security and Digital Forensics

Thank you very much for your support in the past years. With the increasing use of multimedia data and internet technology, there is a rising concern about the security and privacy issues in the distribution of videos, photographs, and computer files in general. New technologies are being developed in CISC to address different security problems. In view of this, CISC organizes the captioned workshop to address several popular topics in these areas.

Details are as follows :

Date : 30 August 2010 (Mon)

Time : Registration - 1:45 pm
Workshop - 2:20 pm to 5:00 pm

Venue : **Theatre T1, Meng Wah Complex**
The University of Hong Kong, Pokfulam Road, Hong Kong

Tentative Programme

1. Latest Researches in CISC : Internet Surveillance and Use of Mobile Phone in Encryption Technologies
2. Online User Profiling Technologies
3. Forensics Video Analysis
4. Visual Trait Classification for Human Face

If you need any further information, please contact Ms Catherine Chan (Tel : 2857 8451, Email : cisconf@cs.hku.hk).
