

A.I. paper Reading Group is a student-led reading group that focuses on a variety of A.I. paper including but not limited to topics like reinforcement learning, natural language processing, computer vision, and etc.. The aim of the reading group is to foster collaborative learning in the field of A.I., in order to speed up the learning process and make sure our members can stay up-to-date on the latest research in A.I.. From the group, we have spin-off teams that participate in A.I. related competitions (HKU DuckieTown team achieved 2nd-runner-up at the AI driving Olympics @ICRA 2019).

ARG is geared towards students who intend to pursue research in A.I. related fields. We welcome both graduate and undergraduate students to participate. Since we have limited spots for year 1 - 3 undergraduate students, 5 year 1 to 3 students who are passionate about the subject, are able to commit to a weekly meeting and are most suitable for the group will be selected from an interview round.

If you would like to know more about ARG and are interested in joining, please come to our information session on **1st November in CB308 from 17:30 to 18:30**. We look forward to seeing you at the information session. If you have any questions, please contact us through arg.hku.hk@gmail.com.
