

Google AI for Social Good and the Power of TensorFlow

Laurence is going to introduce how AI applies to daily life and benefits to all mankind. He will also walk you through the latest highlights of TensorFlow 2.0 and how any developer can quickly get started with Deep Learning for Computer Vision and NLP.

Speaker:
Laurence Moroney
Developer Advocate, Google Brain

Laurence Moroney is an accomplished Developer Advocate on the Google Brain team working to democratize and simplify Artificial Intelligence and Machine Learning for software developers. He is speaker at events all over the world and runs the Tensorflow channel on YouTube. In addition, he is the author of more books on programming than he'd care to count, as well as a best selling science fiction author who would love to break into movies someday.

Wednesday, January 15th 2020
18.00 - 19.30

Hui Pun Hing Lecture Hall (Library Extension, LE1 Lecture Theatre),
The University of Hong Kong
