

AI-GPT TECH SEMINAR

STELLARIS AI

ABOUT THE STELLARIS AI

A HKU SPINOFF PROJECT

Project Introduction

In a game-changing announcement, Stellaris AI, a trailblazing spin-off company from the HKU Department of Computer Science (CS), introduced Stellaris GPT (SGPT), a truly innovative large-scale language model boasting hundreds of billions of parameters. Uniquely, SGPT has been developed entirely from scratch by the Stellaris AI team, without relying on OpenAI or any pre-existing ChatGPT-like systems. This breakthrough achievement offers a powerful AI-driven language model without the encumbrance of copyright or legal risks.

Speaker
Dr. Jacob Wu
CEO, Stellaris AI

Moderator
Mr. Victor Yim
Head of FinTech, Cyberport
